

In order to use Desktop Call Manager R2 with Gmail chat, you need to set up a Gmail account.

In your call manager navigate to Edit->Preferences->Chat Settings.

Enter the information in the picture below. Username should **NOT** include "@gmail.com". Also the network host field contains a lowercase 'L' not an uppercase 'i'. Note that you need to add people to your chat roster in gmail in order for them to display in the Call Manager

Use the following settings to

General			
Display	🔽 Enable Text f	Messaging	
Chat Settings	Network Host	talk.l.google.com	
	Proxy Port	5222	
	User	Username	
	Password	Password	
	Server Name	gmail.com	
	Plain Text Auth	entication
