

AutoProvisioning IP210/320/410/620

1. Create an extension in the PBX and set its Phone Type to the model of phone you wish to provision, Save and Apply Changes
2. Navigate in the PBX to PBX Setup=>General, ensure that Autoprovisioning is Running (click OK if it is Stopped)
3. At the phone, press Menu
4. Select System Settings
5. Select Advanced Settings
6. Press OK when prompted for password as there is no password
7. Select SIP
8. Select Auto Prov
9. Navigate to Extension Number and press the softkey for Modify
10. Enter the extension number
11. Press OK
12. Press Done

If the phone does not autoprovision the 1st time, repeat steps 3-12 again, and select YES when it asks if you wish to overwrite.
